The Canadian Network for Respiratory Care is seeking educators/facilitators and ideas for our upcoming Virtual Conference on Respiratory Care and Education, November 10-13th, 2021. We encourage educators to partner with colleagues to co-facilitate sessions.

We are particularly interested in sessions that will showcase excellence and innovation in the critical thinking & application skills needed for today's respiratory and tobacco educators.

Virtual Education Session Expectations

- Education sessions and workshops will be 60 minutes in length and are expected to be as interactive as possible (e.g. case studies, polls, Q&A, facilitated small group discussions etc.)
- Active experiential approaches to learning models should be promoted – and be based on principles of adult learning & professional development (the sorts of learning experiences that can achieve a wide range of knowledge, skill, values & participation objectives).
- Lecture style input should be kept to a minimum and is always referred to as a “mini-lecture”. (Allow 60% of the time for participant interaction.)
- The content of the education session/workshop should meet the learning needs of the participants (novice to experts).
- A variety of learning experiences should be used – based upon principles of adult learning & professional development.

Benefits of Being a Facilitator

- Be publicly recognized for your skills/knowledge as an educator
- Build your reputation
- Develop new contacts and professional relationships
